

# The National Survey of Student Engagement (NSSE) 2020 Results

## NSSE Working Group January 2020

Eileen Doran

Sue Farruggia

Gena Flynn

Bill Hayward

Nikki Knutson

Danny Lambouths

Tom Moss

Fred McCall

Anna Pasillas-Santoyo

# What is NSSE?

## History

- Launched in 2000 (PEW grant)
- Funded by participation fees funded since 2002
- Housed at Indiana University (Center for Postsecondary Research)

## Methods

- First-year and senior undergraduates
- Sample or census
- Online survey
- Email communications
- Content (40 questions on student experience and 6 on academic advising)
- Survey updated in 2013 (informed by pilot testing, cognitive interviews, focus groups, etc.)

## Participants

- > 1,650 institutions since inception
- 601 institutions in 2020
- 484,242 respondents in 2020

# NSSE at UIC

# NSSE 2020 Survey Administration

## Fall/Winter 2019

- Selected academic advising as additional NSSE topic module with feedback from stakeholders
- Developed marketing materials with the Office of Public and Government Affairs (posters, flyers, Facebook posts, UIC News article, etc.)
- Drafted email messages and planned survey communication schedule
- Finalized participation incentives (20 - \$50 UIC Bookstore Gift Cards and 10 - \$10 Starbucks Gift Cards)

## Winter/Spring 2020

Updated student eligibility status (e.g. updated class levels, flagged non-retained or graduated students)

- Survey administration opened February 11th
- Sent weekly e-mail reminder messages
- Final reminder sent on March 10<sup>th</sup>
- Final response collected on April 29<sup>th</sup> - total of 5 respondents during the COVID-19 pandemic.

# NSSE 2020 Population and Respondents

Survey completions	<i>First-year</i>	<i>Senior</i>
Total population surveyed	4,233	4,804
Total respondents	974	878
% respondents	23%	18%

	<i>First-year</i>				<i>Senior</i>			
	UIC	BOT	USU	AAU	UIC	BOT	USU	AAU
Response rate	23%	25%	24%	19%	18%	21%	19%	16%
Sampling error	+/- 2.8%	+/- 1.0%	+/- 0.6%	+/- 0.9%	+/- 3.0%	+/- 0.9%	+/- 0.5%	+/- 0.8%

# UIC NSSE Respondents vs. Peer Comparison Group Respondents

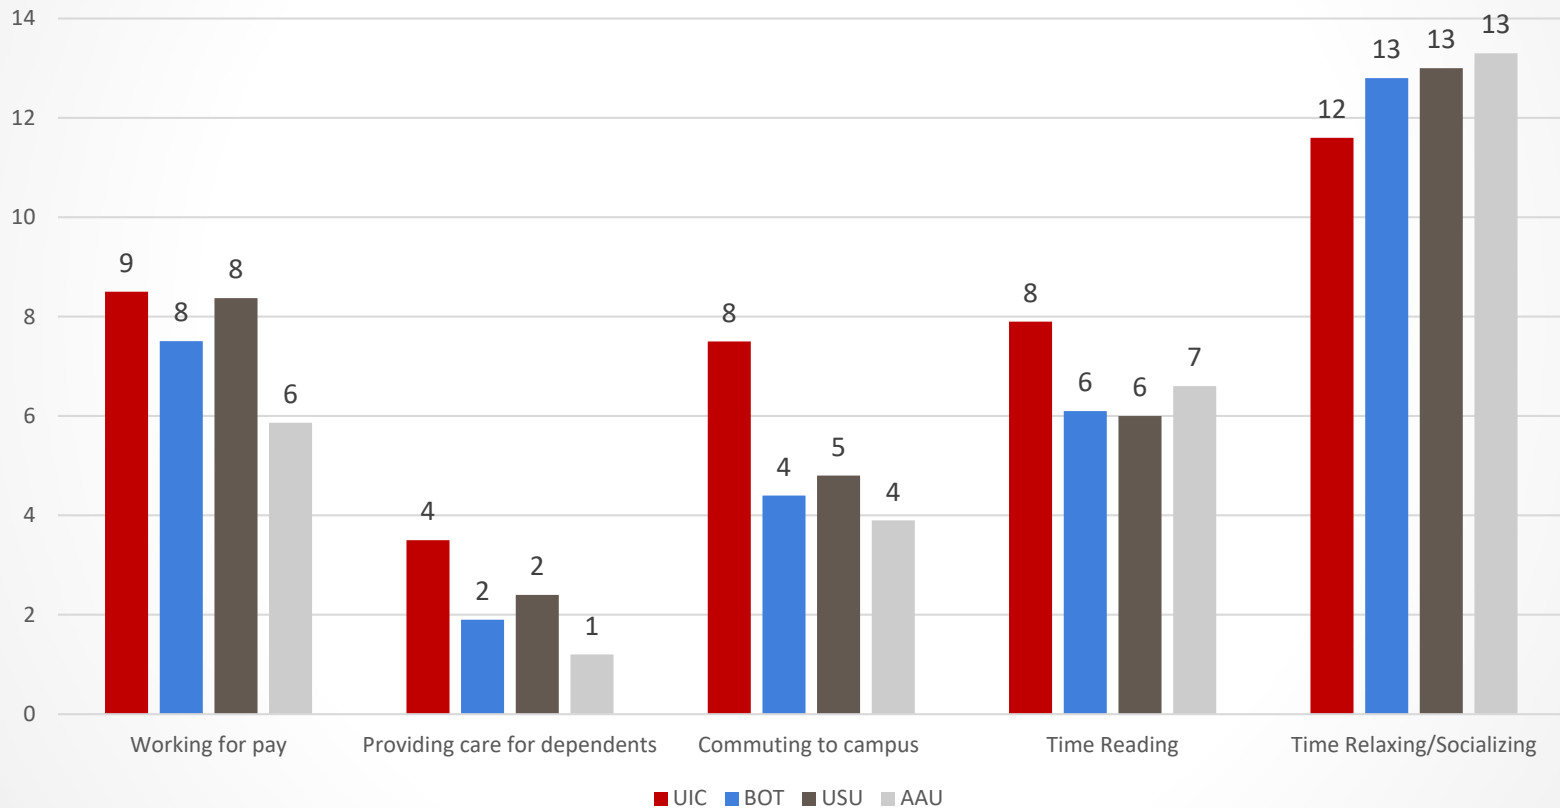

## First-Year Students

UIC first-year students are more likely to be first-generation, Asian, and Hispanic and least likely to be White compared to BOT, USU, AAU peer groups. UIC first-year students are also more likely to live off-campus compared to all three peer groups.

# UIC NSSE Respondents vs. Peer Comparison Group Respondents

First-Year Students  
Average Hours

UIC first-year students spend more time working for pay, providing care for dependents, commuting to campus, and reading (for class) compared to BOT, USU, AAU peer groups. Also, UIC first-year students spend less time relaxing/socializing compared to all three peer groups. These results are consistent with findings from UIC's Equity Dashboard Project and UIC's COVID-19 Student Survey.

# UIC NSSE Respondents vs. Peer Comparison Group Respondents

## Seniors

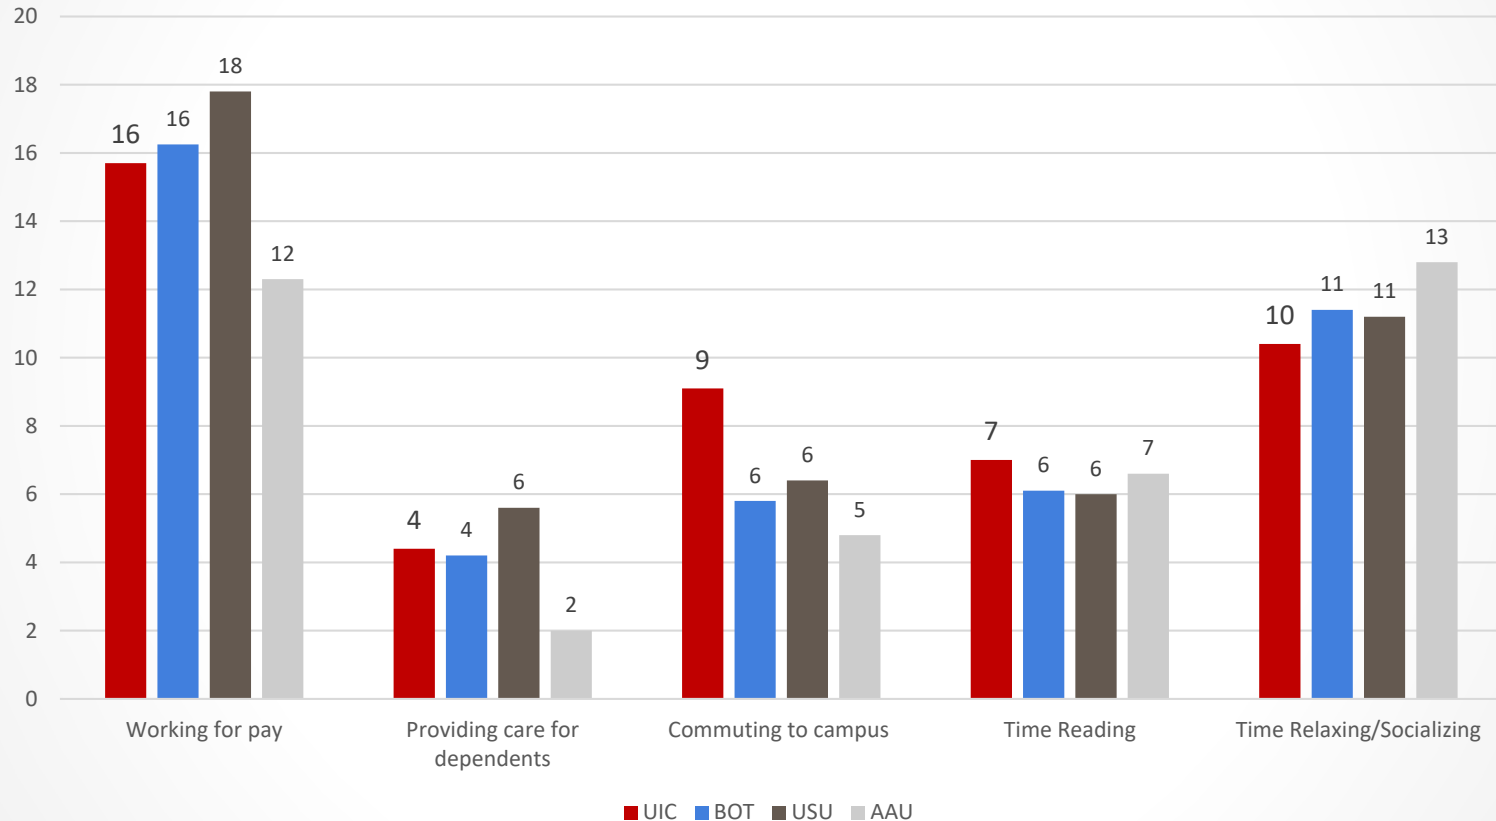

Similar to first years, UIC seniors are more likely to be first-generation, Asian, and Hispanic and least likely to be White compared to BOT, USU, and AAU peer groups. UIC seniors are also more likely to live off-campus compared to all three peer groups.

# UIC NSSE Respondents vs. Peer Comparison Group Respondents

Seniors  
Average Hours

UIC seniors spend more time commuting to campus and less time socializing/relaxing compared to BOT, USU, and AAU peer groups. Also, UIC seniors spend more time reading (for class) compared to BOT and USU peer groups. These results are consistent with findings from UIC's Equity Dashboard Project and UIC's COVID-19 Student Survey.

# NSSE Survey

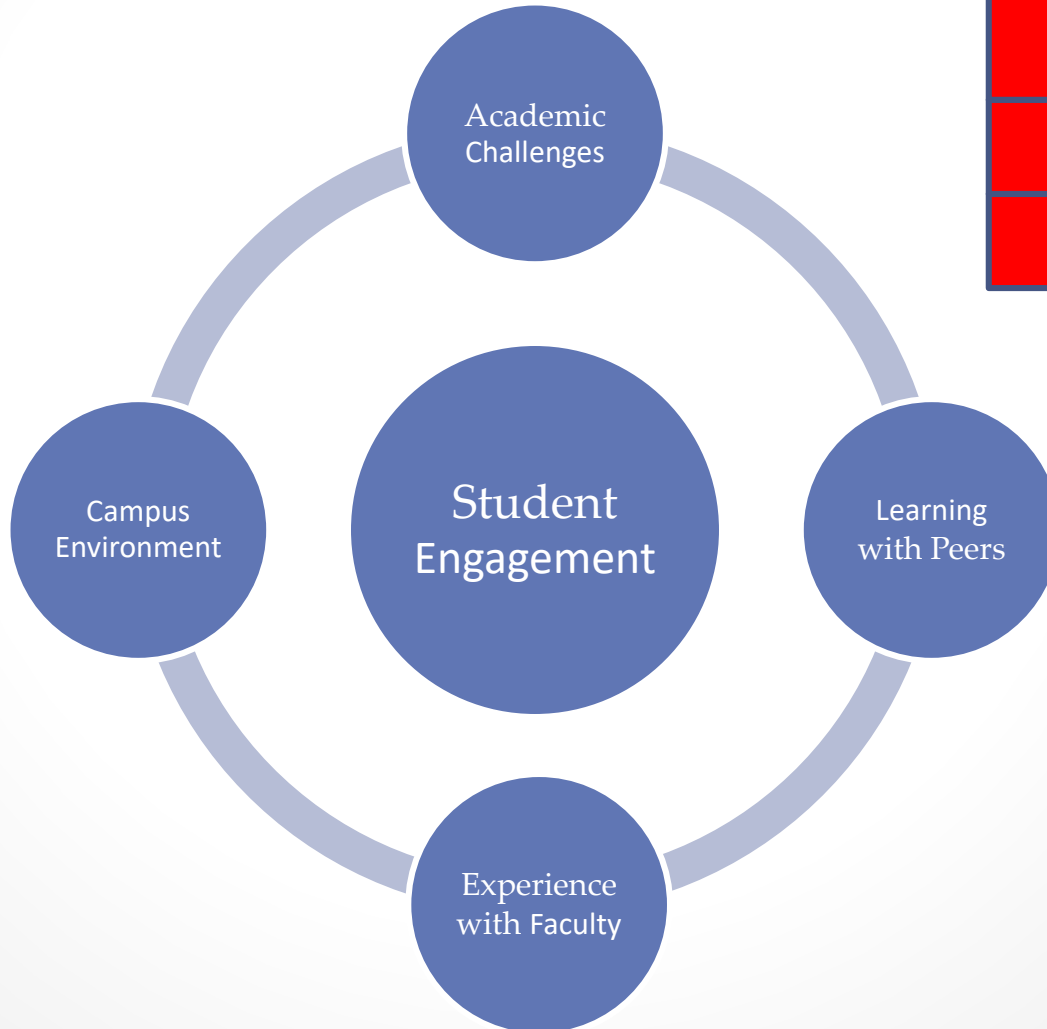

## NSSE Survey Overview

4 student engagement themes (10 engagement indicators)

- High Impact Practices
- Self Assessment of Learning Outcomes
- Topical Module
- Student Satisfaction

# NSSE Survey: High-Impact Practices (HIP)

## HIP Traits

- Demand considerable time & effort
- Facilitate learning outside of the classroom
- Require meaningful interactions with faculty and students
- Encourage collaboration with diverse others
- Provide frequent & substantive feedback

## *High-Impact Practices*

- Learning community or other formal program where groups of students take 2 or more classes together (1<sup>st</sup> year/Seniors)
- Courses that included a community-based project (service-learning) (1<sup>st</sup> year/Seniors)
- Work with a faculty member on a research project (1<sup>st</sup> year/Seniors)
- Internship, co-op, field experience, student teaching, or clinical placement (Seniors)
- Study abroad (Seniors)
- Culminating senior experience: capstone course, project or thesis, portfolio, comprehensive exam, etc. (Seniors)

# UIC NSSE Findings

# Engagement Indicators

**Engagement Indicators (EI):** Items are grouped into 10 Engagement Indicators (40 survey questions total with 3-8 questions for each indicator), organized under four broad themes (see handout). The results are compared to our three comparison group institutions.

**Each EI is scored on a 60-point scale.** To produce an indicator score, the response set for each item is converted to a 60-point scale (e.g., Never = 0; Sometimes = 20; Often = 40; Very often = 60), and the rescaled items are averaged. Thus, a score of zero means a student responded at the bottom of the scale for every item in the EI, while a score of 60 indicates responses at the top of the scale on every item.

**Mean comparisons** report both statistical significance and effect size. Effect size indicates the practical importance of an observed difference. For EI comparisons, NSSE research has concluded that an effect size of about .1 may be considered small, .3 medium, and .5 large. Effect sizes were small between UIC and peer groups for all significant EI differences.

**Els vary more among students within an institution than between institutions,** like many experiences and outcomes in higher education. As a result, focusing attention on average scores alone amounts to examining the tip of the iceberg. It's equally important to understand how student engagement varies within your institution. Score distributions indicate how EI scores vary among your students and those in your comparison groups.

# Peer Comparisons by Engagement Indicators

## First-Year Students

**Engagement Indicators:** The table below shows summary results for UIC first-year students compared to our three comparison group institutions: Significant engagement indicators are emphasized and detailed on subsequent slides.

<i>Theme</i>	<i>Engagement Indicator</i>	<b>UIC 2020</b>	<b>BOT 2020</b>	<b>USU 2020</b>	<b>AAU 2020</b>
<b>Academic Challenges</b>	<b>Higher-Order Learning</b>	<b>39.2</b>	▼ 38.8	▼ 38.2 *	▼ 37.8 *
	Reflective & Integrative Learning	34.9	35.3	35.1	34.5
	<b>Learning Strategies</b>	<b>38.0</b>	▲ 38.3	▲ 38.1	▼ 36.5 *
	Quantitative Reasoning	29.6	30.3	29.2	28.9
<b>Learning with Peers</b>	<b>Collaborative Learning</b>	<b>32.7</b>	▲ 34.9 *	▲ 32.9	▲ 34.4 *
	<b>Discussions with Diverse Others</b>	<b>40.7</b>	▲ 42.4 *	▲ 41.2	▼ 40.6
<b>Experiences with Faculty</b>	<b>Student-Faculty Interaction</b>	<b>21.4</b>	▲ 21.6	▼ 20.7	▼ 19.4 *
	<b>Effective Teaching Practices</b>	<b>38.3</b>	▼ 37.3 *	▼ 37.2 *	▼ 36.8 *
<b>Campus Environment</b>	<b>Quality of Interactions</b>	<b>40.9</b>	▲ 43.3 *	▲ 41.9 *	▲ 42.7 *
	<b>Supportive Environment</b>	<b>34.7</b>	▲ 36.7 *	▲ 36.4 *	▲ 35.5

\*Students' average significantly differs from UIC

Note: All effect sizes associated with significant differences were small (<.3) in magnitude

# Engagement Indicators

## Relative Strengths & Weaknesses\*

### First-Year Students

#### *2020 Relative Strengths*

- Higher-Order Learning
- Effective Teaching Practices
- Student Faculty Interaction

#### *2020 Relative Weaknesses*

- Learning Strategies
- Collaborative Learning
- Discussions with Diverse Others
- Quality of Interactions
- Supportive Environment

\***Relative Strengths/Weaknesses:** Engagement Indicators where UIC performs higher/lower than at least 2 of the 3 peer groups. UIC first-year students performed similar to peer groups on Reflective & Integrative Learning and Quantitative Reasoning engagement indicators.

# Peer Comparisons by Engagement Indicators

## Higher-Order Learning (HO)

UIC first year students reported statistically higher HO scores than all 3 peer groups (BOT, USU, AAU) in 2017 and 2020 and 2 of the 3 peers (USU, AAU) groups in 2015.

# Peer Comparisons by Engagement Indicators

## Effective Teaching Practices (ET)

UIC first year students reported statistically higher ET scores than all 3 peer groups (BOT, USU, AAU) in 2017 and 2020 and 2 of the 3 peer groups (USU, AAU) in 2015.

# Peer Comparisons by Engagement Indicators

## Student-Faculty Interaction (SF)

UIC first year students reported statistically higher SF scores than all 3 peer groups (BOT, USU, AAU) in 2017 and 2 of the 3 peer groups (USU, AAU) in 2020.

# Peer Comparisons by Engagement Indicators

## Learning Strategies (LS)

UIC first year students reported statistically lower LS scores than 2 of the 3 peer groups (USU, AAU) in 2020.

# Peer Comparisons by Engagement Indicators

## Collaborative Learning (CL)

UIC first year students reported statistically lower CL scores than all three peer groups in 2020 (BOT, USU, AAU) and 2 of the 3 peer groups in 2015 and 2017 (AAU, BOT).

# Peer Comparisons by Engagement Indicators

## Discussions with Diverse Others (DD)

UIC first year students reported statistically lower DD scores than 2 of the 3 peer groups (BOT, USU) in 2017 and 2020.

# Peer Comparisons by Engagement Indicators

## Quality of Interactions (QI)

UIC first year students reported statistically lower QI scores than all 3 peer groups (BOT, USU, AAU) in 2015, 2017, and 2020.

# Peer Comparisons by Engagement Indicators

## Supportive Environment (SE)

UIC first year students reported statistically lower SE scores than all 3 peer groups (BOT, USU, AAU) in 2017 and 2 of the 3 peer groups (BOT, AAU) in 2015.

# Peer Comparisons by Engagement Indicators

## Quality of Interactions (QI)

Percentage point difference between first-year students and comparison groups

Quality of Interactions	%	BOT	USU	AAU
<i>Percentage rating their interactions a 6 or 7 (on a scale from 1="Poor" to 7="Excellent") with...</i>				
13a. Students	47	-9	-5	-5
13b. Academic advisors	53	-4	+2	+1
13c. Faculty	45	-6	-2	-4
13d. Student services staff (career services, student activities, housing, etc.)	37	-8	-6	-7
13e. Other administrative staff and offices (registrar, financial aid, etc.)	36	-7	-5	-7

# Peer Comparisons by Engagement Indicators

## Supportive Environment (SE)

Percentage point difference between first-year students and comparison groups

Supportive Environment	%	BOT	USU	AAU
<i>Percentage responding "Very much" or "Quite a bit" about how much the institution emphasized...</i>				
14b. Providing support to help students succeed academically	71	-5	-3	-4
14c. Using learning support services (tutoring services, writing center, etc.)	76	+0	+0	+1
14d. Encouraging contact among students from diff. backgrounds (soc., racial/eth., relig., etc.)	67	+0	+2	+7
14e. Providing opportunities to be involved socially	65	-8	-7	-8
14f. Providing support for your overall well-being (recreation, health care, counseling, etc.)	61	-12	-9	-8
14g. Helping you manage your non-academic responsibilities (work, family, etc.)	39	-5	-5	+3
14h. Attending campus activities and events (performing arts, athletic events, etc.)	56	-11	-11	-12
14i. Attending events that address important social, economic, or political issues	44	-3	-4	-1

# Higher-Order Learning (HO) by Race/Ethnicity and Gender

## First-Year Students

Note: Results of One-way ANOVA test reveal no significant differences by race.

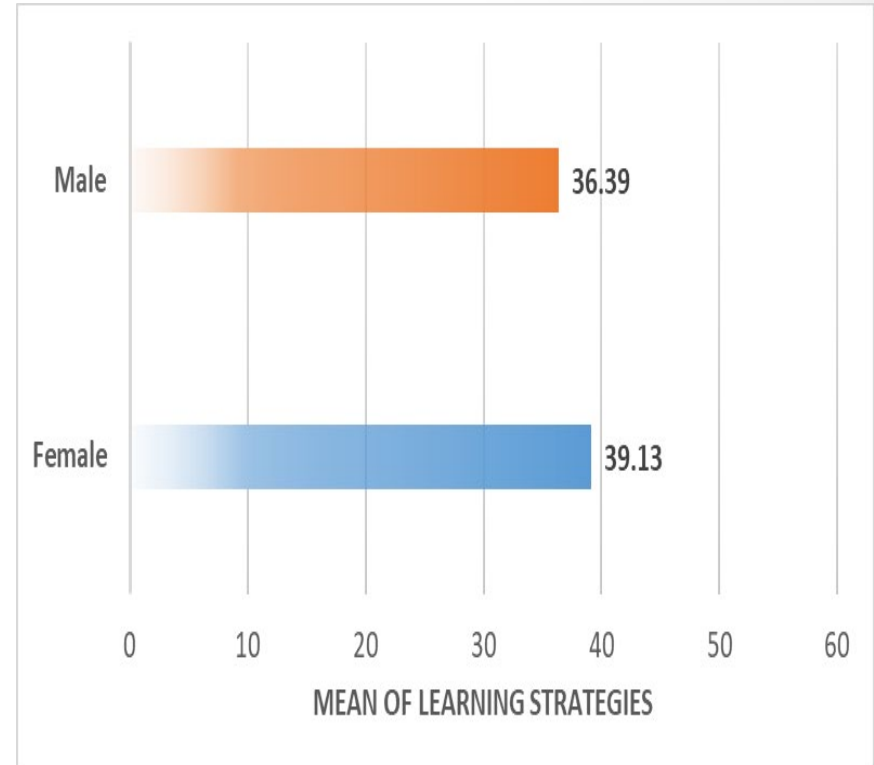

Note: Results of One-way ANOVA test reveal no significant differences by gender.

# Learning Strategies (LS) by Race/Ethnicity and Gender

## First-Year Students

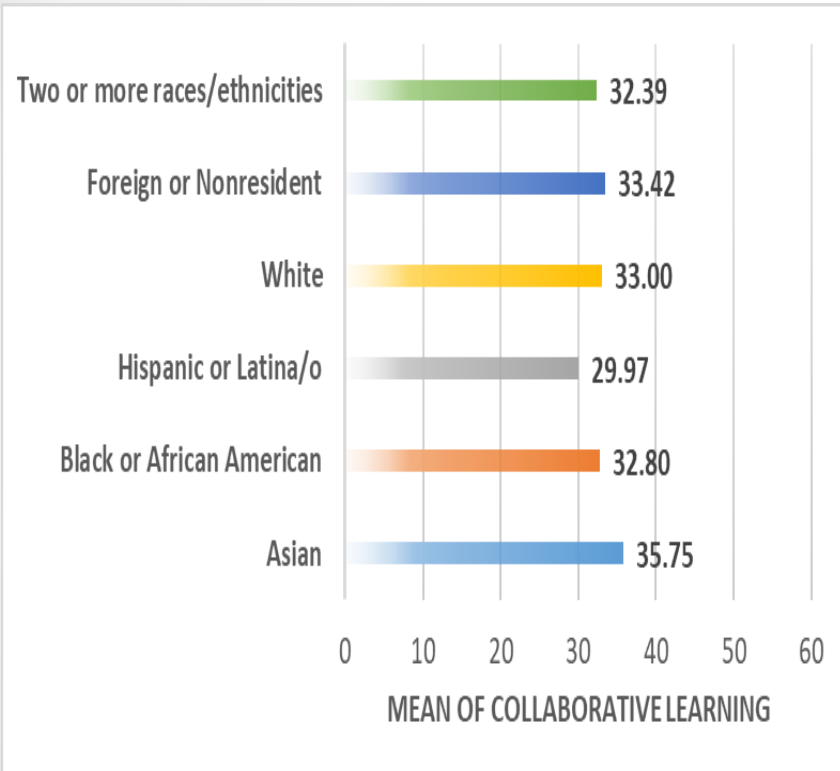

Note: Results of One-way ANOVA test reveal no significant differences by race.

Note: Results of One-way ANOVA test reveal that female first-year students report significantly higher LS scores than their male counterparts. Female first-year students' LS scores are higher than the reported LS scores of all three peer groups (BOT, USU, AAU).

# Collaborative Learning (CL) by Race/Ethnicity and Gender

## First-Year Students

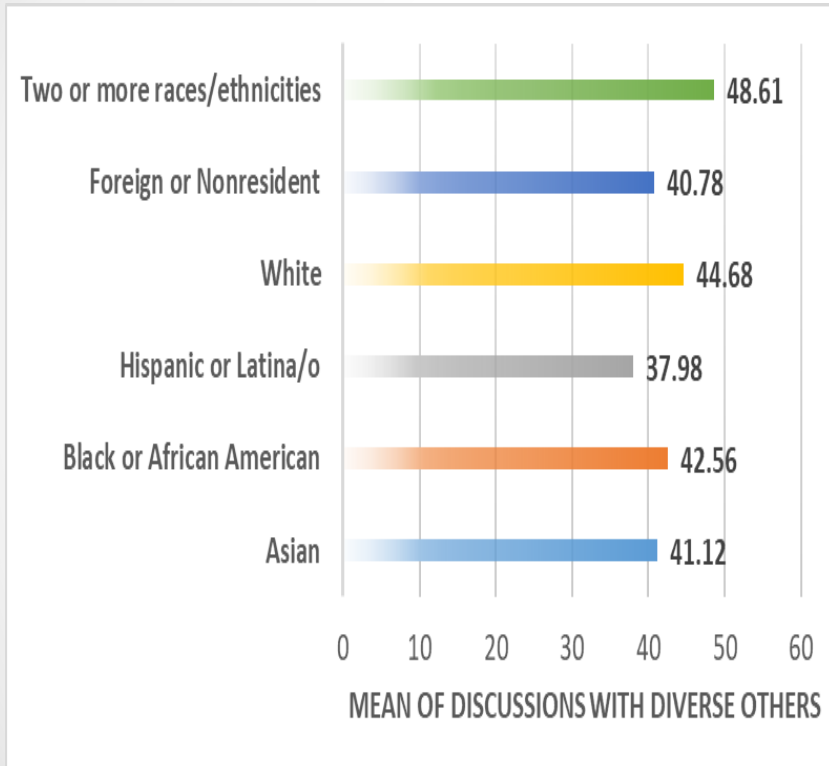

Note: Results of One-way ANOVA test reveal that Asian first year students report significantly higher CL scores than Hispanic first year students.

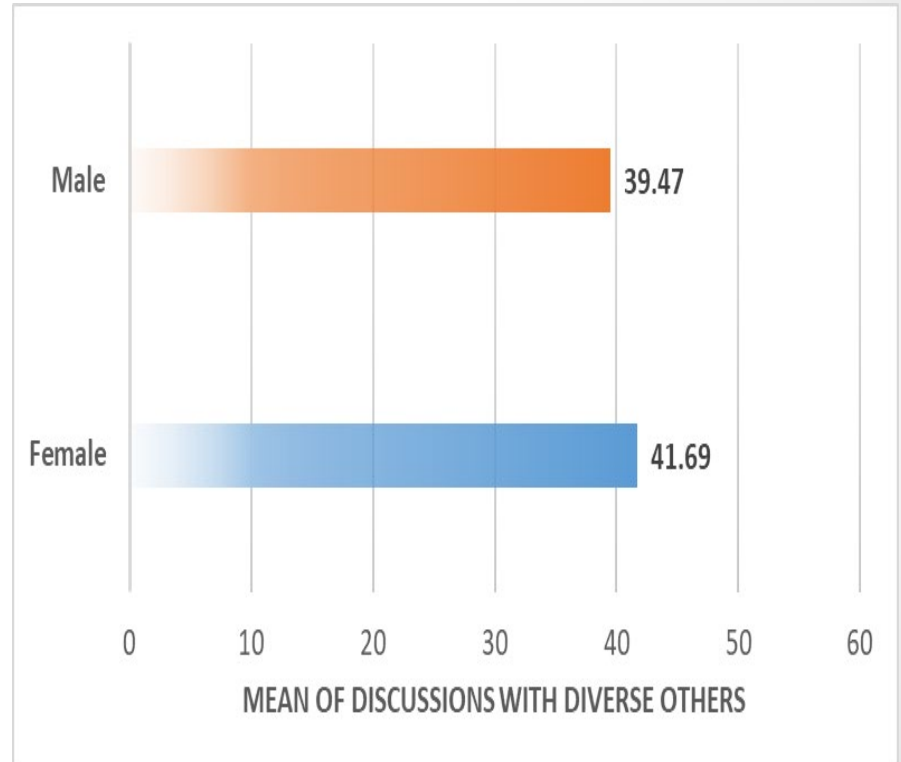

Note: Results of One-way ANOVA test reveal no significant differences by gender.

# Discussions with Diverse (DD) Others by Race/Ethnicity and Gender

## First-Year Students

Note: Results of One-way ANOVA test reveal that White first year students report significantly higher DD scores than Hispanic first year students.

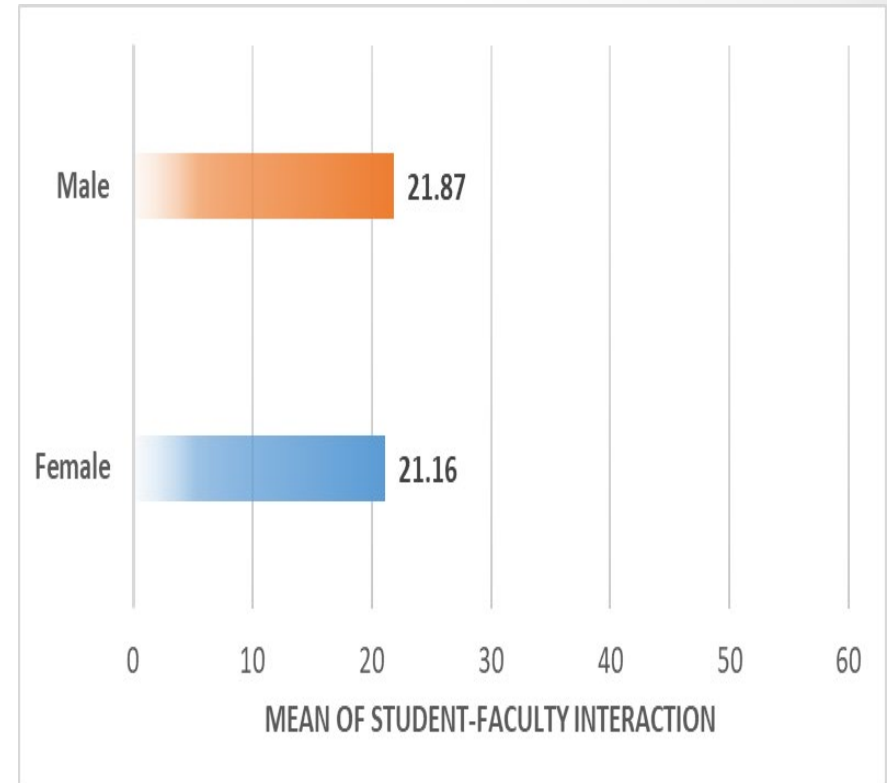

Note: Results of One-way ANOVA test reveal no significant differences by gender.

# Student-Faculty Interaction (SF) by Race/Ethnicity and Gender

## First-Year Students

Note: Results of One-way ANOVA test reveal that International first year students report significantly higher SF scores than Asian, Hispanic, and White first year students.

Note: Results of One-way ANOVA test reveal no significant differences by gender.

# Effective Teaching Practices (ET) by Race/Ethnicity and Gender

## First-Year Students

Note: Results of One-way ANOVA test reveal no significant differences by race.

Note: Results of One-way ANOVA test reveal no significant differences by gender.

# Quality of Interactions (QI) by Race/Ethnicity

## First-Year Students

Note: Results of One-way ANOVA test reveal no significant differences by race.

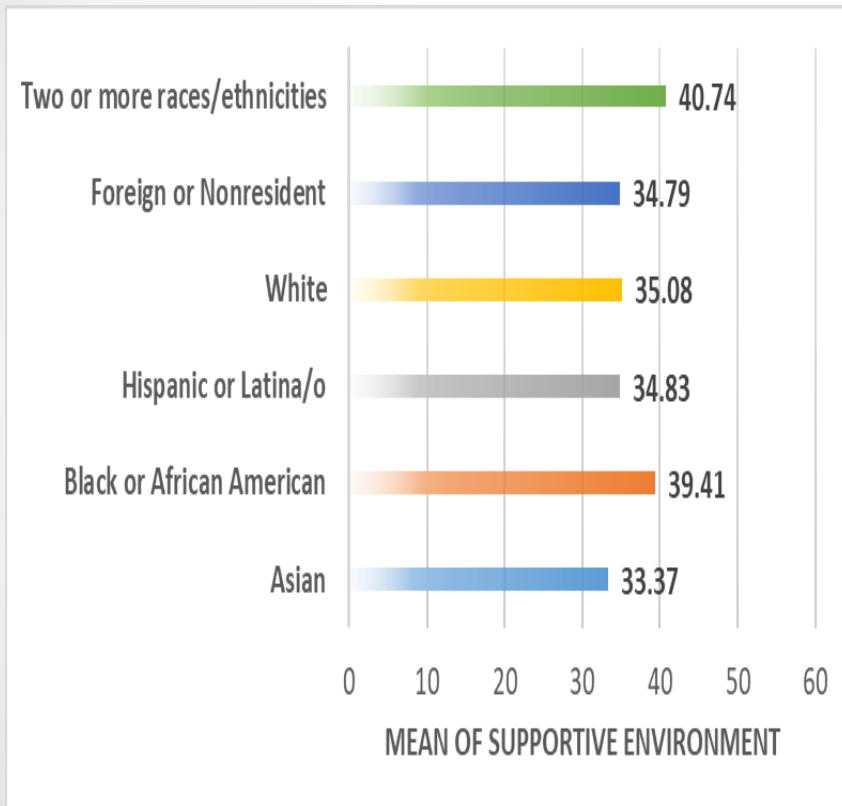

Note: Results of One-way ANOVA test reveal no significant differences by gender.

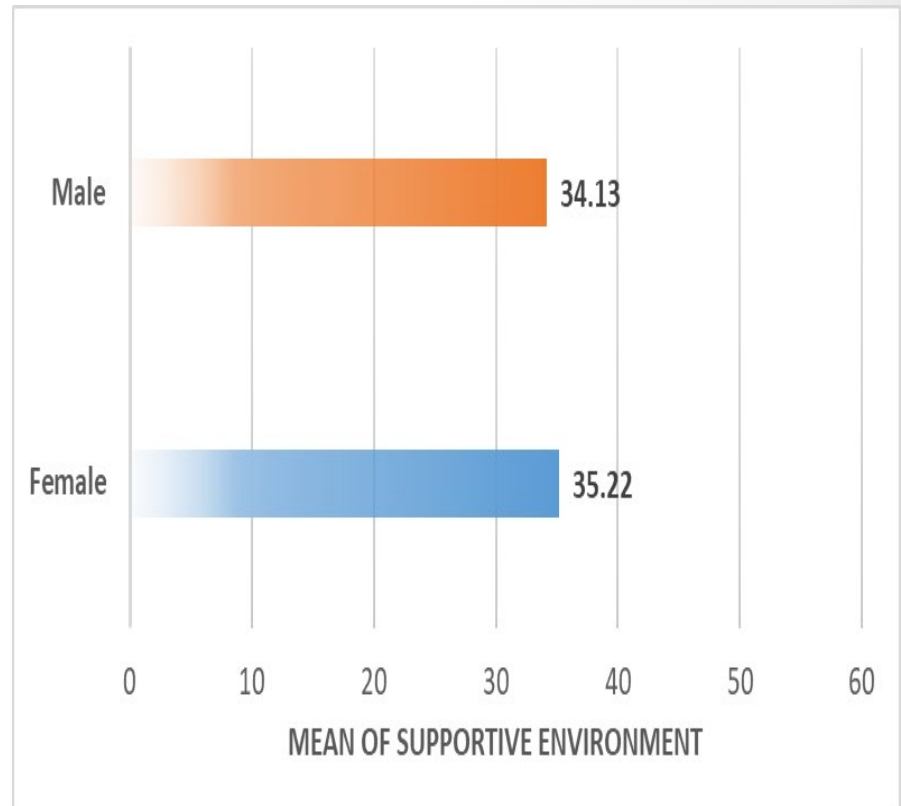

# Supportive Environment (SE) by Race/Ethnicity

## First-Year Students

Note: Results of One-way ANOVA test reveal no significant differences by race.

Note: Results of One-way ANOVA test reveal no significant differences by race.

# Engagement Indicators

## Relative Strengths & Weaknesses\*

### Senior Students

#### *Relative Strengths*

- Collaborative Learning

#### *Relative Weaknesses*

- Reflective & Integrative Learning
- Learning Strategies
- Effective Teaching Strategies
- Quality of Interactions
- Supportive Environment

\***Relative Strengths/Weaknesses:** Engagement Indicators where UIC performs higher/lower than at least 2 of the 3 peer groups. UIC seniors performed similar to peer groups on Higher-Order Learning, Quantitative Reasoning, Discussions with Diverse Others, and Student-Faculty Interaction engagement indicators.

# Peer Comparisons by Engagement Indicators

## Senior Students

**Engagement Indicators:** The table below shows summary results for UIC senior students compared to our three comparison group institutions. Significant engagement indicators are emphasized and detailed on subsequent slides.

		UIC	BOT	USU	AAU
<i>Theme</i>	<i>Engagement Indicator</i>	2020	2020	2020	2020
Academic Challenges	Higher-Order Learning	38.8	39.3	39.7	38.3
	<b>Reflective &amp; Integrative Learning</b>	<b>36.0</b>	<b>▲ 37.2 *</b>	<b>▲ 37.5 *</b>	<b>▲ 36.8</b>
	<b>Learning Strategies</b>	<b>37.1</b>	<b>▲ 38.4 *</b>	<b>▲ 38.7 *</b>	<b>▼ 35.5 *</b>
	Quantitative Reasoning	31.3	30.9	30.5	31.3
Learning with Peers	<b>Collaborative Learning</b>	<b>35.3</b>	<b>▼ 33.7 *</b>	<b>▼ 32.7 *</b>	<b>▼ 35.0</b>
	Discussions with Diverse Others	42.1	42.5	42.0	41.2
Experiences with Faculty	Student-Faculty Interaction	22.0	22.9	22.2	22.3
	<b>Effective Teaching Practices</b>	<b>36.6</b>	<b>▲ 38.1 *</b>	<b>▲ 38.5 *</b>	<b>▲ 37.5</b>
Campus Environment	<b>Quality of Interactions</b>	<b>38.9</b>	<b>▲ 41.4 *</b>	<b>▲ 41.4 *</b>	<b>▲ 41.7 *</b>
	<b>Supportive Environment</b>	<b>31.0</b>	<b>▲ 32.0</b>	<b>▲ 32.8 *</b>	<b>▲ 31.5</b>

\*Students' average significantly differs from UIC

Note: All effect sizes associated with significant differences were small (<.3) in magnitude

# Peer Comparisons by Engagement Indicators

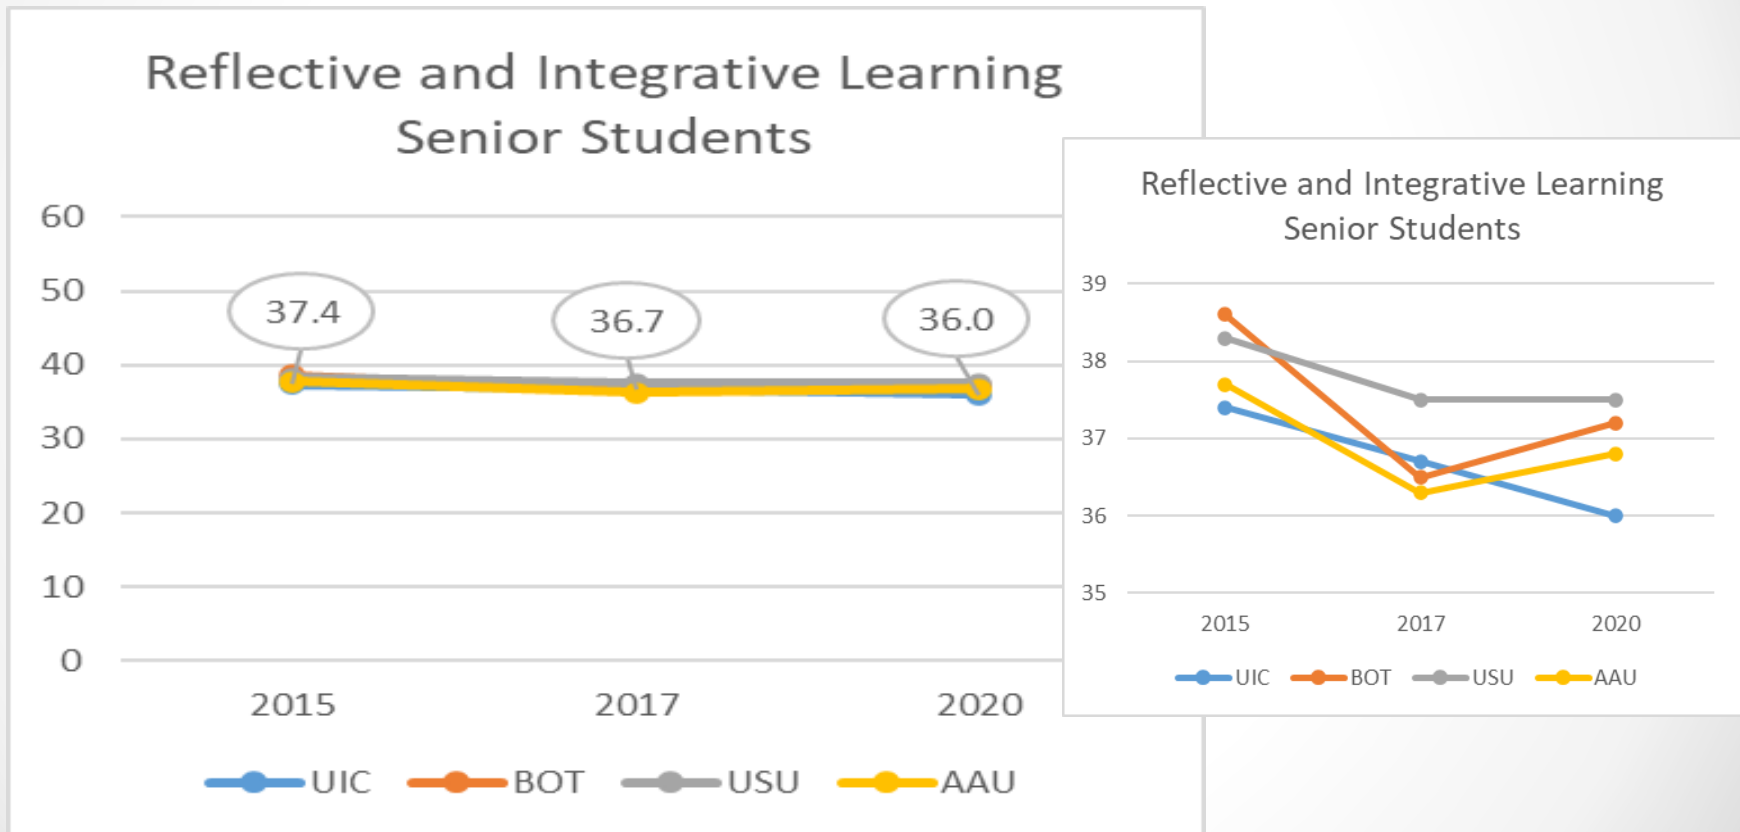

## Collaborative Learning (CL)

UIC senior students reported statistically higher CL scores than all 3 peer groups (BOT, USU, AAU) in 2015, 2017, and 2020.

# Peer Comparisons by Engagement Indicators

## Reflective & Integrative Learning (RI)

UIC senior students reported statistically lower RI scores than all 3 peer groups (BOT, USU, AAU) in 2015 and 2020.

# Peer Comparisons by Engagement Indicators

## Learning Strategies (LS)

UIC senior students reported statistically lower LS scores than 2 of 3 peer groups (BOT, USU) in 2015 and 2020.

# Peer Comparisons by Engagement Indicators

## Effective Teaching Practices (ET)

UIC senior students reported statistically lower ET scores than all 3 peer groups (BOT, USU, AAU) in 2015 and 2020 and 2 of the 3 peer groups (BOT, USU) in 2017.

# Peer Comparisons by Engagement Indicators

## Quality of Interactions (QI)

UIC senior students reported statistically lower QI scores than all 3 peer groups (BOT, USU, AAU) in 2015, 2017, and 2020.

# Peer Comparisons by Engagement Indicators

## Supportive Environment (SE)

UIC senior students report statistically lower Se scores than all 3 peer groups (BOT, USU, AAU) in 2015, 2017, and 2020.

# Peer Comparisons by Engagement Indicators

## Quality of Interactions (QI)

Percentage point difference between seniors and comparison groups

Quality of Interactions	%	BOT		USU		AAU	
<i>Percentage rating their interactions a 6 or 7 (on a scale from 1="Poor" to 7="Excellent") with...</i>							
13a. Students	65		-5		-4		-5
13b. Academic advisors	62		-9	-7	-7	-9	-9
13c. Faculty	61		-6		-5		-3
13d. Student services staff (career services, student activities, housing, etc.)	58		-3		-3		-2
13e. Other administrative staff and offices (registrar, financial aid, etc.)	55		-6		-7		-6

# Peer Comparisons by Engagement Indicators

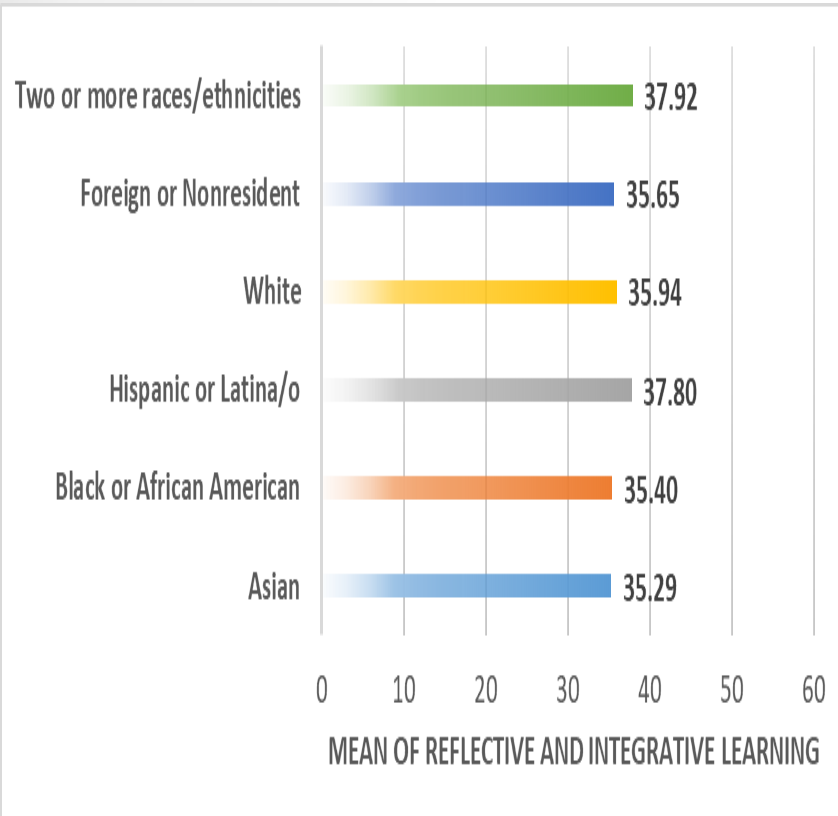

## Supportive Environment (SE)

Percentage point difference between seniors and comparison groups

Supportive Environment	%	BOT	USU	AAU
<i>Percentage responding "Very much" or "Quite a bit" about how much the institution emphasized...</i>				
14b. Providing support to help students succeed academically	65	-2	-3	-2
14c. Using learning support services (tutoring services, writing center, etc.)	62	+0	-1	+0
14d. Encouraging contact among students from diff. backgrounds (soc., racial/eth., relig., etc.)	61	+4	+2	+11
14e. Providing opportunities to be involved socially	58	-6	-8	-8
14f. Providing support for your overall well-being (recreation, health care, counseling, etc.)	55	-5	-6	-4
14g. Helping you manage your non-academic responsibilities (work, family, etc.)	31	+2	-2	+7
14h. Attending campus activities and events (performing arts, athletic events, etc.)	45	-10	-11	-14
14i. Attending events that address important social, economic, or political issues	38	-1	-4	+1

# Reflective and Integrative Learning (RI) by Race/Ethnicity and Gender

## Senior Students

Note: Results of One-way ANOVA test reveal no significant differences by race.

Note: Results of One-way ANOVA test reveal that female first-year students report significantly higher LS scores than their male counterparts. Female first-year students' LS scores are higher than the reported LS scores of all three peer groups (BOT, USU, AAU).

# Learning Strategies (LS) by Race/Ethnicity and Gender

## Senior Students

Note: Results of One-way ANOVA test reveal no significant differences by race.

Note: Results of One-way ANOVA test reveal that female first-year students report significantly higher LS scores than their male counterparts. UIC Female seniors LS scores are more aligned with BOT and USU peer groups (male and female consolidated scores).

# Collaborative Learning (CL) by Race/Ethnicity and Gender

## Senior Students

Note: Results of One-way ANOVA test reveal no significant differences by race.

Note: Results of One-way ANOVA test reveal no significant differences by gender.

# Effective Teaching Practices (ET) by Race/Ethnicity and Gender

## Senior Students

Note: Results of One-way ANOVA test reveal no significant differences by race.

Note: Results of One-way ANOVA test reveal no significant differences by gender.

# Quality of Interactions (QI) by Race/Ethnicity and Gender

## Senior Students

Note: Results of One-way ANOVA test reveal no significant differences by race.

Note: Results of One-way ANOVA test reveal no significant differences by gender.

# Supportive Environment (SE) by Race/Ethnicity and Gender

## Senior Students

Note: Results of One-way ANOVA test reveal no significant differences by race.

Note: Results of One-way ANOVA test reveal no significant differences by race.

# Summary of NSSE Results vs. BOT Peer Group

Theme	Engagement Indicator	UIC students compared with BOT	
		First-year	Senior
Academic Challenge	Higher-Order Learning	--	--
	Reflective & Integrative Learning	--	▽
	Learning Strategies	--	▽
	Quantitative Reasoning	--	--
Learning with Peers	Collaborative Learning	▽	△
	Discussions with Diverse Others	▽	--
Experiences with Faculty	Student-Faculty Interaction	--	--
	Effective Teaching Practices	△	▽
Campus Environment	Quality of Interactions	▽	▽
	Supportive Environment	▽	--

△ Your students' average was significantly higher ( $p < .05$ ) with an effect size less than .3 in magnitude.

▽ Your students' average was significantly lower ( $p < .05$ ) with an effect size less than .3 in magnitude.

# Comparison of First-Year and Senior Student NSSE Results

<i>Theme</i>	<i>Engagement Indicator</i>	<b>First-Year Mean</b>	<b>Seniors Mean</b>	<b>Difference between FY to SR</b>
<i>Academic Challenge</i>	Higher-Order Learning	39.2	38.8	-0.4
	Reflective and Integrative Learning	34.9	36.0	1.1
	Learning Strategies	38.0	37.1	-0.9
	Quantitative Reasoning	29.6	31.3	1.7
<i>Learning with Peers</i>	Collaborative Learning	32.7	35.3	2.6
	Discussions with Diverse Others	40.7	42.1	1.4
<i>Experiences with Faculty</i>	Student-Faculty Interaction	21.4	22.0	0.5
	Effective Teaching Practices	38.3	36.6	-1.8
<i>Campus Environment</i>	Quality of Interactions	40.9	38.9	-2.1
	Supportive Environment	34.7	31.0	-3.8

# HIP Participation

## First-Year Students

The figure below displays the percentages of first-year students who participated in at least one high-impact practice for UIC and our peer groups for years 2015, 2017 and 2020. The figure is limited to participation in service-learning, a learning community, and research with faculty. Our BOT peer group has been trending upward while UIC decreased from 55% to 51%.

# HIP Participation by Gender

## First-Year Students

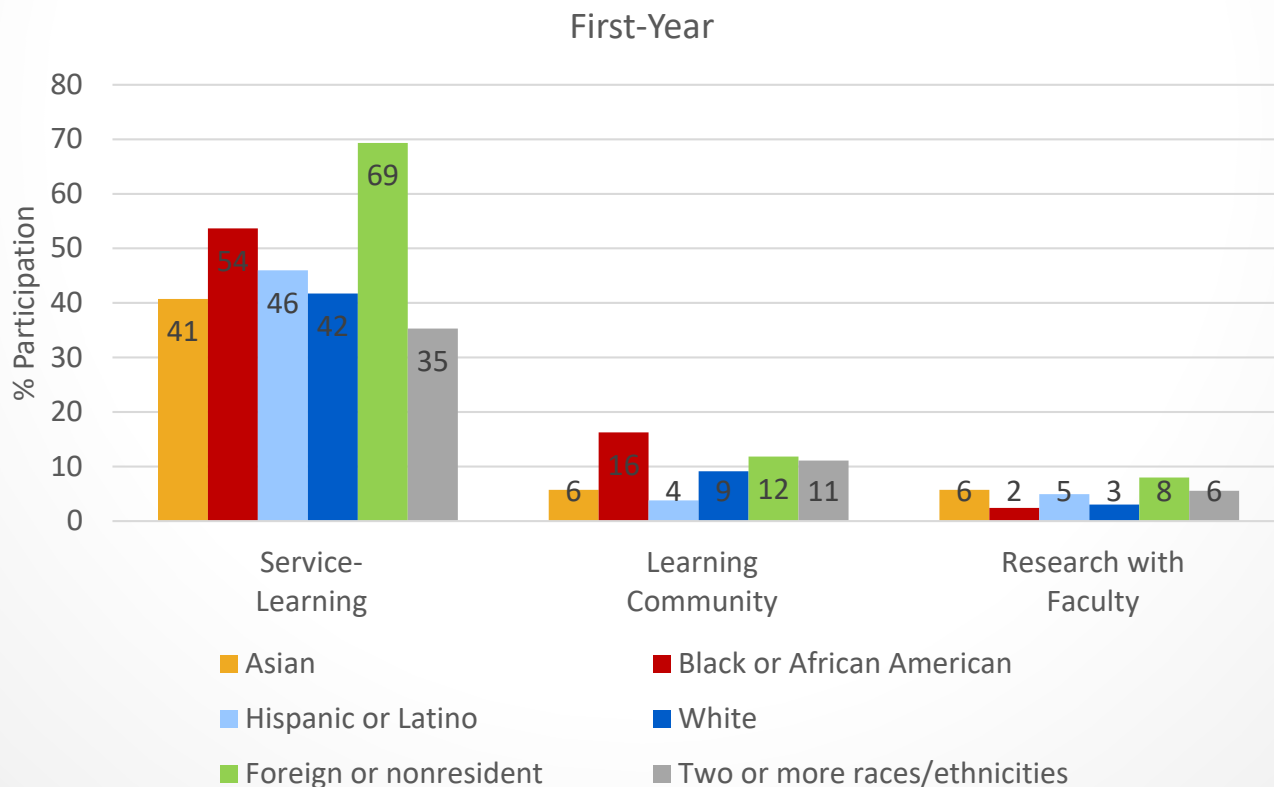

The table below displays the percentage of first-year students who participated in each HIP by gender. Male students participate in service-learning and research with faculty at slightly higher rates than female students.

# HIP Participation by Race/Ethnicity

## First-Year Students

The table below displays the percentage of first-year students who participated in each HIP by race/ethnicity. Foreign or nonresident students participate in service-learning and research with faculty at higher rates than the other groups while Black or African American students participate in learning communities at higher rates.

# HIP Participation

## Senior Students

The figure below displays the percentages of seniors who participated in at least one high-impact practice for UIC and our peer groups for years 2015, 2017 and 2020. The figure includes all six HIPs: Learning Community, Service-Learning, Research w/Faculty, Internship, Study Abroad, Culminating Senior Experience. UIC and our USU comparison group have both seen declining HIP participation while BOT and AAU groups have increased HIP participation.

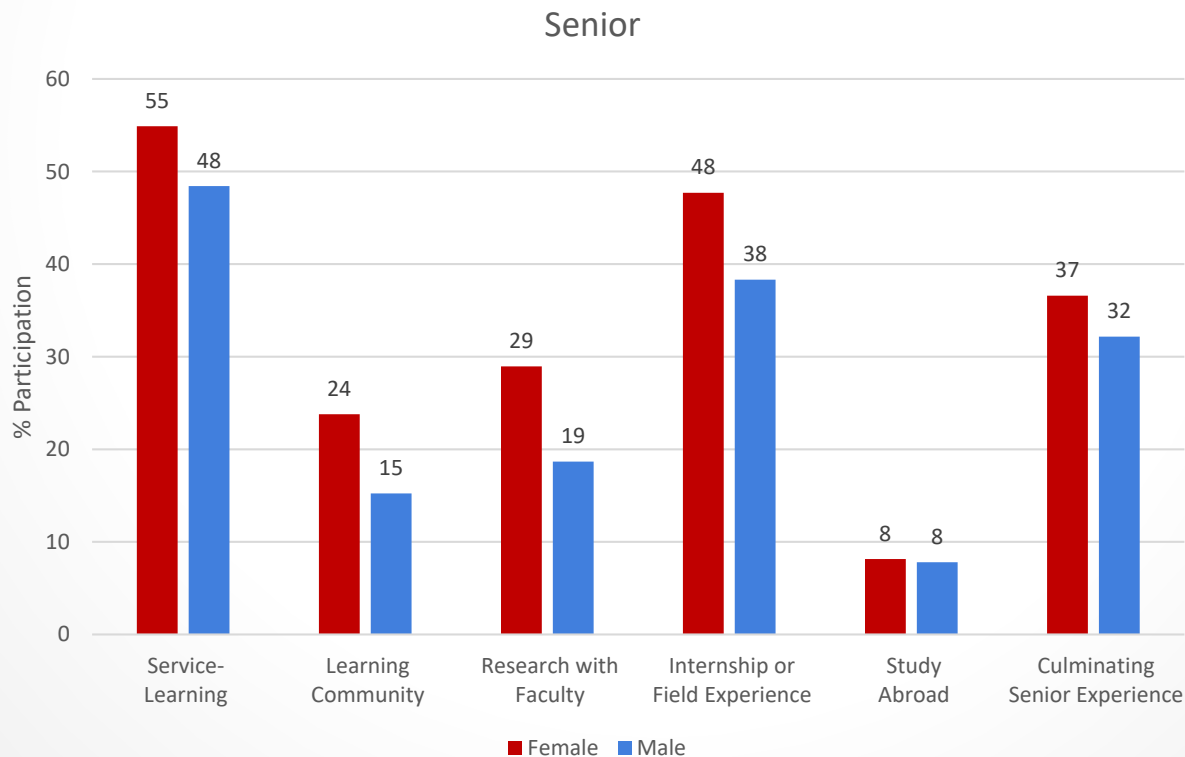

# HIP Participation by Gender

## Senior Students

The table below displays the percentage of senior students who participated in each HIP by gender. Male student HIP participation is at or below the female student participation rate across all six HIPs.

# HIP Participation by Race/Ethnicity

## Senior Students

The table below displays the percentage of senior students who participated in each HIP by race/ethnicity. Foreign or nonresident student participation is highest in service-learning and study abroad while Black or African American student participation is highest in research with faculty, internships and culminating senior experience.

Asian  
White

Black or African American  
Foreign or nonresident

Hispanic or Latino  
Two or more races/ethnicities

# How Students Assess Their Experience

## Perceived Gains Among Seniors

Students reported how much their UIC experience contributed to their knowledge, skills, and personal development in the 10 areas listed below.

# Perceived Gains Among Seniors by Race/Ethnicity

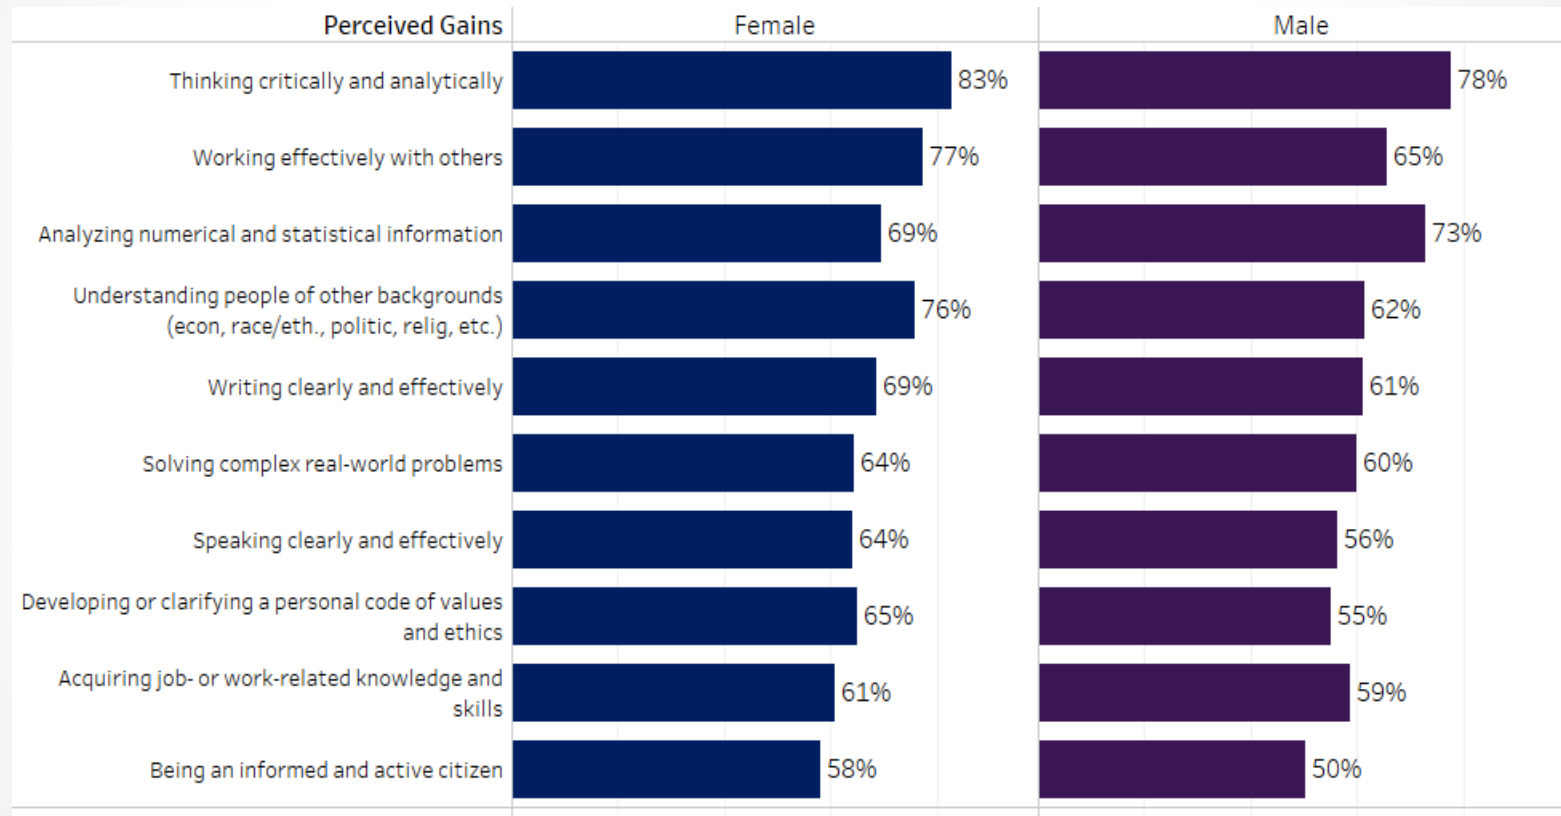

The lowest rated perceived gain for Black or African American and Foreign or Nonresident students was "Acquiring job or work-related knowledge and skills" whereas for the rest of the race/ethnic groups it was "Being an informed and active citizen." The highest perceived gain was "Thinking critically and analytically" for all groups except Foreign or Nonresident students whose highest perceived gain was "Understanding people of other backgrounds."

Percentage responding "Very Much" or "Quite a Bit"

# Perceived Gains Among Seniors by Gender

The highest and lowest rated perceived gains were the same for female and male students; however, males rated the gains lower than females.

Percentage responding "Very Much" or "Quite a Bit"

# How Students Assess Their Experience

## Satisfaction with UIC

UIC scored 7 to 8 percentage points below BOT Peers when asked about their overall experience with UIC. When asked whether or not they would choose UIC again, UIC scored 9 percentage points below BOT Peers.

Percentage Rating Their Overall Experience as "Excellent" or "Good"

Percentage Who Would "Definitely" or "Probably" Attend This Institution Again

# Overall Experience Rating by Race/Ethnicity and Gender

Among first-year students, Black or African American students rated their overall experience at UIC the lowest while Foreign/Nonresident and Multi-Race students rated their UIC experience the highest. Among senior students, Asian students rated their UIC experience the lowest and Multi-Race students rated their UIC experience the highest.

Male senior students rated their overall UIC experience the lowest.

Percentage Rating Their Overall Experience as "Excellent" or "Good"

Percentage Rating Their Overall Experience as "Excellent" or "Good"

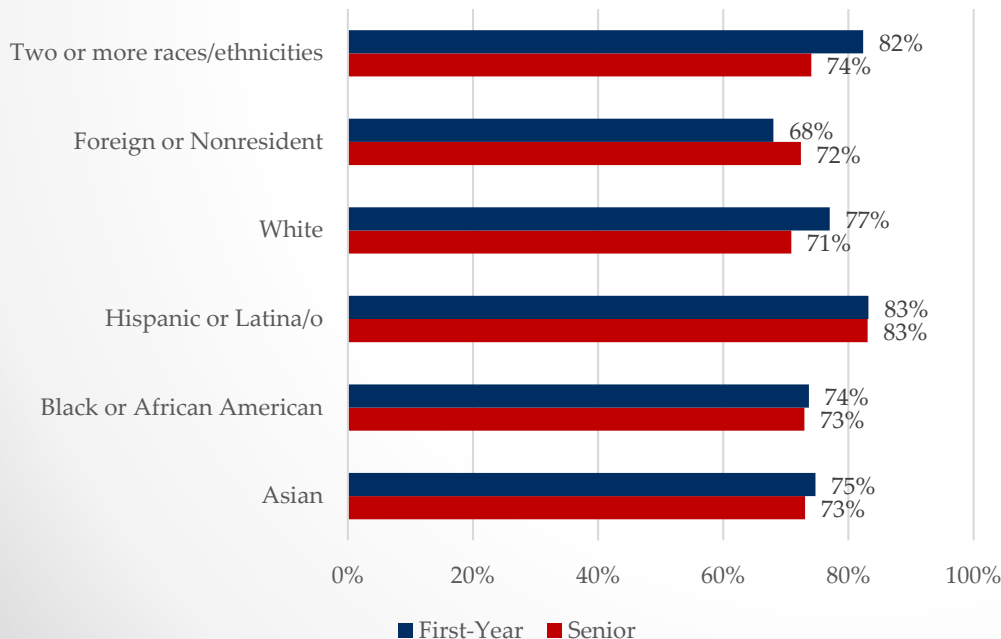

# Overall Experience Rating by Gender

Among first-year students, 83% of Hispanic/Latina/o students reported that they'd attend UIC again while only 68% of Foreign/Nonresident students said they'd attend UIC again. Among seniors, 83% of Hispanic/Latina/o students reported that they'd attend UIC again while only 71% of White students said they'd attend UIC again.

A slightly higher percentage of female students reported that they'd attend UIC again.

Percentage Who Would "Definitely" or "Probably" Attend This Institution Again

Percentage Who Would "Definitely" or "Probably" Attend This Institution Again

# Discussion Frequencies by Advising Source

## First-Year Students

First-year students discussed their academic interests, course selections, or performance with an academic advisor/faculty/staff assigned to them the most (95.2% had at least one discussion). In comparison to our peer group, this is 6.2% higher. Of those who selected “0”, 29% indicated that they did not know how to contact an advisor at UIC. Peer advisor/mentor was less of an advising source in comparison to our peer group.

During the current school year, how many times have you discussed your academic interests, course selections, or academic performance with the following?

# Academic Advising and First-Year Students

First-year students feel that people and resources at UIC are very respectful of their identity and culture with 75.1% reporting “quite a bit & very much.” This was 3% higher than our peer group.

Thinking about academic advising, how much have people and resources at your institution done the following?

# Discussions with Academic Advisors

## First-Year Students

The most frequent discussion first-year students had with their academic advisor was regarding how their major or expected major relates to their goals and future plans (53.2%). This was slightly higher than our peer group. First-year students discussed participation in co-curricular activities less than other topics; however, at a slightly higher frequency than our peer group.

Thinking about academic advising, about how often did someone at your institution discuss the following with you?

# Developing Goals & Plans by Advising Source

## First-Year Students

First-year students reported family members as being the most helpful in developing their academic goals and future plans. In comparison to our peer group, this is slightly lower (-1.7%).

How much have each of the following helped you develop your academic goals and future plans?

# Discussion Frequencies by Advising Source Seniors

Seniors discussed their academic interests, course selections, or performance with an academic advisor/faculty/staff assigned to them the most (89.1% had at least one discussion). In comparison to our peer group, this is 4.3% higher. Of those who selected “0”, 9% indicated that they did not know how to contact an advisor at UIC.

During the current school year, how many times have you discussed your academic interests, course selections, or academic performance with the following?

# Academic Advising and Seniors

Seniors feel that people and resources at UIC are very respectful of their identity and culture with 60.8% reporting “quite a bit & very much.” This was 4.4% lower than our peer group.

Thinking about academic advising, how much have people and resources at your institution done the following?

# Discussions with Academic Advisors

## Seniors

The most frequent discussion senior students had with their academic advisor was regarding how their major or expected major relates to their goals and future plans (44.6%). This was slightly higher than our peer group. Seniors discussed participation in co-curricular activities less than other topics; however, at a slightly higher frequency than our peer group.

Thinking about academic advising, about how often did someone at your institution discuss the following with you?

# Developing Goals & Plans by Advising Source

## Seniors

Seniors reported friends or other students being the most helpful in developing their academic goals and future plans. In comparison to our peer group, this is slightly lower (-1.3%).

How much have each of the following helped you develop your academic goals and future plans?

# NSSE Discussion Points

# UIC 2020 NSSE Discussion Points: Studying Subgroups of Students

The profile of UIC students compared to NSSE peers shows that UIC students are:

- more likely to be first-generation students,
- more likely to be Latinx or Asian-American,
- less likely to live in campus housing, and
- more likely to live farther than walking distance from campus.

These differences provides context in interpreting some of the peer comparisons. NSSE does not provide peer results by these student characteristics, so our methodological approach has been to explore differences within the UIC results.

# UIC 2020 NSSE Discussion Points:

## Teaching and Learning

UIC is lower than it's peers on a number of areas related to teaching and learning (higher in some areas too).

- How do we engage faculty, particularly those that teach first-year students?

# UIC 2020 NSSE Discussion Points: Equity Gaps and NSSE Results

NSSE findings provide evidence for inequities, such as race/ethnic differences in:

- collaborative learning,
- discussions with others from different backgrounds,
- understanding of others from different backgrounds,
- acquiring work skills,
- numeracy skills, and
- overall student satisfaction.

The findings show no significant inequities in others areas. This has been true with previous NSSE results.

Why do the perceptions of students (with the exception of overall student satisfactory) show less inequity than the direct measures of student success (retention, graduation rates, academic performance, etc.) where we see significant equity gaps?

# UIC 2020 NSSE Discussion Points: HIP Participation and Outcomes

High Impact Practices (HIP) participation is high at UIC for under-represented minorities.

Black undergraduate seniors are more likely than Whites to participate in service-learning, research with faculty, internships, and culminating senior experiences.

Student outcomes do not match the participation rates.

For example, Black undergraduate seniors report lower gains in acquiring work skills than Whites.

What explains this inconsistency?

# UIC 2020 NSSE Discussion Points: Quality of Interactions and Supportive Environment

The NSSE findings once again show that UIC first-years assess their experience with a supportive environment and the quality of their interactions lower than peers do.

How do we best respond to these finding? Should we form a first-year experience committee and make a formal commitment to improving the first-year?

# UIC 2020 NSSE Discussion Points: Advising

UIC is similar to it's peers on most advising areas.

Advising on major and academics plans are most common; other areas are less so

Findings do point to a number of domains that would be beneficial for students:

How do we best respond to these finding? How can we continue to coordinate among the advising, coaching and engagement staff?

# UIC 2020 NSSE Discussion Points: Tracking Undergraduate Experience

NSSE tracks the experience of first-years and seniors. It is only one of many measures. How strategic is UIC in tracking the student experience from first-year to graduation?

Do we have good documentation of all of our tracking efforts to determine if we are being strategic?

How could we best document and evaluation our efforts?

# UIC 2020 NSSE Discussion Points: Metrics and Expectations for Undergraduate Experience

NSSE provides us with an opportunity to think about coordinating the tracking of progress in the student experience and outcomes.

How do we develop a set of well-defined expectations of how NSSE and other metrics should improve?

How do we best coordinate communicating those expectations and tracking them?

How do we document the resource implications of improving on these metrics?

# UIC 2020 NSSE Discussion Points: College Level Analyses

Our initial analysis is at the institutional level (all undergraduates). College level results are forthcoming and they will be shared with all the colleges.

We have not systematically tracked college level findings in the past. A coordinated effort could identify best practices at the college level.

# UIC 2020 NSSE Discussion Points: Improving Survey Response Rate

Our response rate to the survey is similar to peers, but we would like it to be higher.

We have engaged many across the UIC community to build awareness of the survey.

We are looking for new ideas to raise our response rates in the future.

# NSSE Next Steps at UIC

# UIC 2020 NSSE Additional Analyses

- Complete detailed analysis of separate academic advising module survey questions
- Provide college level summaries to Deans
- Use NSSE engagement indicators to study retention and graduation (are they predictive?)
- Study how NSSE engagement indicators vary by additional subgroups of undergraduates (first gen, pell, other?)

Note: UIC is steward (has copy) of NSSE student level data for UIC respondents. Institutions do not have access to peer data.
